

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

Boie (Isis, 1831, 546) gave five species under his genus *Chrysolampis*, as follows: 1. *Troch. moschitus* Linn., 2. — *elatus* Gm., 3. — *cyanomelas* Gm., 4. — *guianensis* Gm., 5. — *carbunculus* Gm. Now Nos. 2, 4, and 5 are synonyms of No. 1, and No. 3 is a synonym of *Trochilus jugularis* Linn., and as it has been shown above that *Trochilus moschitus* (or *mosquitus*) Linn. is the type of *Orthorhynchus* it leaves *Trochilus jugularis* Linn. as the type of *Chrysolampis* Boie.

Boie (Isis, 1831, 547) gave four species under his genus *Eulampis*, as follows: 1. *Tr. violaceus* Gm., 2. — *jugularis* Linn., 3. — *auratus* —, 4. — *niger* P. Max. Nos. 1 and 3 are synonyms of No. 2, and as that is already the type of *Chrysolampis* it leaves *Trochilus niger* P. Max. as the type of *Eulampis* Boie. — J. H. RILEY, *Washington, D. C.*

On the Proper Name of the Tody of Jamaica. — Linnæus in the 10th edition of the 'Systema Naturæ,' p. 116, named the Jamaican Tody, [*Alcedo*] *Todus*. In the 12th edition of the same work, p. 178, when he instituted the genus, *Todus*, he renamed it, [*Todus*] *viridis*, the name it has since gone under, but in view of the above fact it should be known in the future as *Todus todus* by those zoölogists who regard the 10th edition of the 'Systema Naturæ' as the starting point of zoölogical nomenclature. — J. H. RILEY, *Washington, D. C.*

The Bobolink in Colorado. — In his bulletin on Birds of Colorado Professor Cooke notes five records of the Bobolink (*Dolichonyx oryzivorus*) in the State, including eight birds in all, and in his second supplement gives two more records of one bird each. Other records may now be added. One bird was taken at Boulder about two years ago by Mr. L. C. Bragg, the specimen bearing no date and no record having been made of it. One was seen by the writer east of Boulder on July 9, 1903. One was reported on the University campus at Boulder by Dr. J. R. Brackett, on July 30, 1903. Ten males and several females were seen by the writer and Mr. H. F. Watts in marshy ground just east of Boulder on May 24, 1904, and about the same number on May 30 and 31. I was accompanied on the last trip by Professor C. Juday. I have heard rumors of their occurrence here before, and am inclined to suspect that they may be found in a restricted area every year. — JUNIUS HENDERSON, *Boulder, Colorado.*

Henslow's Sparrow in Munroe County, Pa. — While on a walk with Wm. J. Sewill, between Stroudsburg and Mount Pocono, Monroe Co., Pa., May 29 of this year, I heard the note of Henslow's Sparrow (*Coturniculus henslowii*) and upon investigation at least two pairs were found. They were in a field, well up on the mountain just above Henryville, acting as usual and uttering their *che-ticks* from time to time. — WILLIAM L. BAILY, *Philadelphia, Pa.*
